

Programación Python para Machine Learning

Lección 12: Modelos no supervisados.

RECURSOS

How to Combine PCA and K-means Clustering in Python?

<https://365datascience.com/tutorials/python-tutorials/pca-k-means/>

Unsupervised machine learning: PCA, K-means and Hierarchical clustering using Python

<https://aggieanil.wordpress.com/2017/08/23/machine-learning-ii-unsupervised-machine-learning-clustering-and-principal-component-analysis/>

Clustering metrics better than the elbow-method

<https://towardsdatascience.com/clustering-metrics-better-than-the-elbow-method-6926e1f723a6>

How to Automatically Determine the Number of Clusters in your Data - and more

<https://www.datasciencecentral.com/profiles/blogs/how-to-automatically-determine-the-number-of-clusters-in-your-dat>
